

## **STPM Grant Application**

Paul Seviour

Trumpington Meadows

**Please provide a brief description of the group and its aims. Please include details of any connection with South Trumpington Parish.**

Trumpington Meadows is designated as a 20mph speed limit zone but there are only two signs indicating this. They are situated at both exits/entrances to the estate.

We consider the area around the local centre to be very vulnerable (school, Sainsburys, food vans etc.) and there are no signs to remind motorists of the speed limit. There have been accidents in this area including a recent one when a car embedded itself in a bollard outside Sainsburys.

According to data from The Royal Society for the Prevention of Accidents, at traffic speeds of 30-40mph, the risk of pedestrian death because of a collision with a vehicle is **5.5 times more likely** than at speeds between 20-30mph

**Please describe what the grant will be used for and how it will benefit the residents of South Trumpington Parish. Please provide an estimate of how many people in total you hope to benefit.**

We wish to install 24"x35" Solar Powered Radar Speed Display Signs with Flashing Speed Limit Indicator at either side of the local centre on Osprey Drive. These will indicate the vehicle speed in green if below 20mph and will flash the speed in red if over 20mph.

We also wish to install 20 mph signs on posts along Consort Ave and Osprey Drive left vacant after removal of parking notices

We believe these measures will improve road safety around the local centre for school children, shoppers, residents etc.

**Please set out how much money you are asking for and how this relates to the total project costs. Please tell us about other sources of funding that you have or have applied**

24"x35" Solar Powered Radar Speed Display Signs x 2 = £1221

20 mph signs x 10 = £50

Metal cable ties = £20

Other agencies such as Highways have been approached for funding but no response yet.
